

## MICRO SWITCH Heavy-Duty Limit Switch (Stainless Steel) **002426**

HDLS LS2 Series

Issue 1

**Datasheet**

### DESCRIPTION

When the application requires an industrial grade limit switch where wet, dust, or corrosive environments may be present, Honeywell offers the LS2 Series of stainless steel limit switches. The limit switch body and actuating heads are cast from 316 stainless steel. These limit switches are available with a wide variety of actuating heads with a one-pole or two-pole snap-action double-break contact block. A threaded conduit is integral to the switch body with terminal screws for each wiring point on the contact block. Honeywell can provide the switches factory wired for reduced installation. The limit switches can also be factory wired with the limit switch body epoxy encapsulated, minimizing any dust or liquid migrating to the switch contacts. The limit switches can be front mounted with two through holes or rear mounted with two integral threaded holes from the back side.

As with the other HDLS Series of limit switches, the LS2 Series have UL, CSA, CE, and CCC certifications for global acceptance.

### DIFFERENTIATION

- Stainless steel housing designed for corrosive and adverse environments
- All-metal drive chain for consistent operating characteristics
- Three different electrical connectivity options; threaded conduit, factory wired, or factory wired with epoxy encapsulated body
- Side rotary head incorporates stainless steel shaft with bronze bearing for increased mechanical life of up to 50 million operations
- Wide selection of stainless steel levers to compliment the side rotary limit switch

### FEATURES

- 316 Series stainless steel actuating heads and body with stainless steel screws
- Designed to IP 65/66/67 and NEMA 1, 3, 3R, 4, 4X, 6, 6P, 12, and 13
- Diaphragm seal between head and body provides an extra degree of sealing
- Fluorocarbon seals standard for chemically harsh environments and/or higher temperature applications (121 °C/250 °F)
- Optional fluorosilicone seals for low temperature (-40 °C/-40 °F) applications
- Available with 1NC/1NO or 2NC/2NO double break contacts. Same polarity for each pole (Za)
- Side rotary head with center neutral or sequential switch design available
- Actuator heads can be field rotated to any of four positions 90° apart
- Side rotary heads are factory adjusted for CW and CCW actuation of the switch. Heads can be field adjusted for CW only or CCW only to actuate the switch
- CCC, CE, CSA, and UL certifications for global acceptance

### POTENTIAL APPLICATIONS

- Food processing plants
- Petrochemical plants
- Power generating plants
- Pulp and paper mills
- Shipboard and dockside locations
- Transportation hubs and facilities
- Water treatment and wastewater treatment facilities

### VALUE TO CUSTOMERS

- Harsh-duty stainless steel switch withstands many tough environments including dust, dirt, grime, heat, and washdown areas
- Variety of actuator heads and switch options
- Threaded conduit or factory wired
- Silver contacts or optional gold-plated contacts
- Made in the USA

### PORTFOLIO

The heavy-duty LS2 Series stainless steel limit switches are a portion of Honeywell's heavy duty HDLS Series limit switches which also include the HDLS Series and the factory sealed HDLS Series. Honeywell has a comprehensive line of general purpose limit switches, compact precision limit switches, miniature limit switches, and specialty limit switches. To view the entire product portfolio, click [here](#).

## MICRO SWITCH Heavy-Duty Limit Switch, Stainless Steel (LS2 Series)

**Table 1. Specifications**

Characteristic	Parameter
Product type	MICRO SWITCH heavy-duty limit switch, LS2 Stainless Steel Series
Certifications	UL, CSA, CE, CCC
Reference standards	UL508, CSA C22.2 # 14, EN/IEC 60947-5-1, GB 14048.5
Housing material	316 Series stainless steel
Actuator heads	Side rotary Side rotary (maintained) Side rotary (sequential) Side roller plunger Top roller plunger Side rotary (low pretravel & low torque) Side rotary (center neutral) Side pin plunger Top pin plunger
Termination	0.5-14 NPT, 0.75-14 NPT Factory wired with or without epoxy encapsulated body; 1,5 mm <sup>2</sup> (16 AWG) cable SPDT with 5-conductor cable Ø12,7 mm [0.5 in] DPDT with 9-conductor cable Ø15,7 mm [0.62 in]
Contact options	1NC/1NO, 2NC/2NO, 2NC/2NO center neutral, 2NC/2NO sequential
Contact type	Snap-action double break (form Za); Same polarity each pole
Contact material	Silver alloy (standard), gold-plated (low-energy applications)
Utilization category	AC15, A600; DC13, R300
Rated operational voltage (U <sub>e</sub> )	600 Vac; 250 Vdc
Rated operational current (I <sub>e</sub> )	1.2 A, 0.1 A
Rated thermal current (I <sub>th</sub> )	10 A, 2.5 A
Rated insulation voltage (U <sub>i</sub> )	600 V
Rated impulse withstand voltage (U <sub>imp</sub> )	2500 V
Short circuit protection device (SCPD) type and rating	Class J fuse, rated 10 A, 600 V
Pollution degree	3
Sealing	IP 65/66/67; NEMA 1, 3, 3R, 4, 4X, 6, 6P, 12, and 13 With cable; IP 65/66/67; NEMA 1, 3, 3R, 4, 6, 6P, and 12
Operating temperature	Refer to page 6, Table 5, for temperature range of limit switch with different seals or actuator heads Cable temp. range: -20 °C to 105 °C [-4 °F to 221 °F]
Vibration	10 g, conforming to IEC 60068-2-6
Shock (actuator not fitted)	50 g, conforming to IEC 60068-2-27

## MICRO SWITCH HDLS STAINLESS STEEL LS2 SERIES ACTUATOR HEADS

**SIDE ROTARY:** Available levers provide greater versatility. Actuating heads can be indexed in any of four positions, 90° increments. All are momentary action except maintained head (LS2N Series).

**LS2A - Standard:** 15° maximum pretravel, 5° (single-pole) and 7° (double-pole) maximum differential travel, 60° minimum overtravel.

**LS2N - Maintained contact:** Maintained on counterclockwise rotation and reset on clockwise rotation, and vice versa.

**LS2H - Low torque, low differential travel:** Features low operating torque and narrow differential travel. 68° minimum overtravel.

**LS2L - Sequence action:** Delayed action between operation of two poles. 48° minimum overtravel.

**LS2M - Center neutral:** One pole operates on the clockwise rotation, and the other pole on the counterclockwise rotation. 53° minimum overtravel.

**SIDE PLUNGERS:** Available with 4,83 mm [0.19 in] minimum overtravel. Side plungers are offered in a pin plunger and a roller plunger.

**LS2E - Side pin plunger:** A stainless steel plunger for actuating motion inline with the plunger travel. Actuating head may be indexed in any of four positions, 90° apart. A boot seal on the plunger and a seal between the head and housing. Momentary action.

**LS2F - Side roller plunger:** With a stainless steel roller plunger, this switch fits in close quarters under cams and slides. The head may be indexed in any of four positions, 90° apart. **The roller can be turned vertical or horizontal to the switch.** Seals are same as side pin plunger. Momentary action.

**TOP PLUNGERS:** Available with 4,83 mm [0.19 in] minimum overtravel. Top plungers are offered in pin plunger and a roller plunger.

**LS2C - Top pin plunger:** A stainless steel plunger for in-line actuating motion. A boot seal on the plunger and a seal between the actuator head and housing. Momentary action.

**LS2D - Top roller plunger:** A stainless steel roller and plunger that is adjustable to 90° angles to accept cam or slide operation from any of two directions. Boot seal on the plunger and a seal between the actuator head and housing. Momentary action.

## ELECTROMECHANICAL SWITCHES

Definitions below explain the meaning of operating characteristics. Characteristics shown in tables were chosen as most significant. They are taken at normal room temperature and humidity. These may vary as temperature and humidity conditions differ. Sketches show how characteristics are measured for in-line plunger actuation, rotary actuation, and includes bar chart description.

Linear dimensions for in-line actuation are from top of plunger to a reference line, usually the center of the mounting holes. Rotary actuated HDLS limit switches have the characteristics in degrees of angular rotation.

**Differential Travel (D.T.)** – Plunger or actuator travel from point where contacts “snap-over” to point where they “snapback.”

**Free Position (F.P.)** – Position of switch plunger or actuator when no external force is applied (other than gravity).

**Full Overtravel Force** – Force required to attain full overtravel of actuator.

**Operating Position (O.P.)** – Position of switch plunger or actuator at which point contacts snap from normal to operated position. Note that in the case of flexible or adjustable actuators, the operating position is measured from the end of the lever or its maximum length. Location of operating position measurement shown on mounting dimension drawings.

**Operating Force (O.F.)** – Amount of force applied to switch plunger or actuator to cause contact “snap-over.” Note in the case of adjustable actuators, the force is measured from the maximum length position of the lever.

**Overtravel (O.T.)** – Plunger or actuator travel safely available beyond operating position.

**Pretravel (P.T.)** – Distance or angle traveled in moving plunger or actuator from free position to operating position.

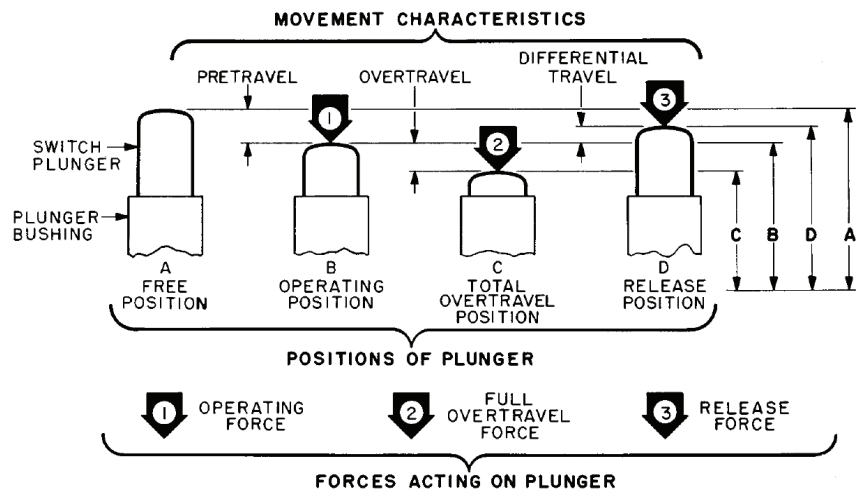

**Release Force (R.F.)** – Amount of force still applied to switch plunger or actuator at moment contacts snap from operated position to unoperated position.

**Total Travel (T.T.)** – Distance from actuator free position to overtravel limit position.

## ROTARY ACTUATION

## IN-LINE PLUNGER ACTUATION

## Bar Chart Description (Inline and Rotary)

NC = Normally closed contact(s)  
NO = Normally open contact (s)

## MICRO SWITCH HDLS Side Rotary Levers' Cam Tracking

Levers for side and top rotary switches are normally ordered as separate catalog listings. They also may be ordered by including a suffix to the switch catalog listing (see nomenclature tree in this document) and adding the lever price.

**Figure 13. LS2Z51 Type Levers Cam Tracking**

**Figure 14. LS2Z52 Type Levers Cam Tracking**

Table 9. Replacement Actuating Heads for LS2 Limit Switches

Catalog Listing	Actuating Head Type	Description
LS2Z1A	Side rotary, standard force and travel	Replacement head for the LS2A Series side rotary limit switch with fluorocarbon seals
LS2Z1AB	Side rotary, standard force and travel with low temp. seals	Replacement head for the LS2YAB Series side rotary limit switch with fluorosilicone seals
LS2Z1H	Side rotary, low pre-travel and low torque	Replacement head for the LS2H Series side rotary limit switch with fluorocarbon seals
LS2Z1N	Side rotary, maintained	Replacement head for the LS2N Series side rotary maintained limit switch with fluorocarbon seals
LS2Z1CB	Top pin plunger, with low temp. seals	Replacement head for the LS2YCB Series top pin plunger limit switch with fluorosilicone seals
LS2Z1D	Top roller plunger	Replacement head for the LS2D Series top roller plunger limit switch with fluorocarbon seals
LS2Z1DB	Top roller plunger, with low temp. seals	Replacement head for the LS2YDB Series top roller plunger limit switch with fluorosilicone seals
LS2Z1E	Side pin plunger	Replacement head for the LS2E Series side pin plunger limit switch with fluorocarbon seals
LS2Z1F	Side roller plunger	Replacement head for the LS2F Series side roller plunger limit switch with fluorocarbon seals

Catalog Listing	Contact Block Type	Description
LSZ3K	1NC-1NO	Replacement contact block with 1NC/1NO (single-pole) contact
LSZ3L	2NC-2NO	Replacement contact block with 2NC/2NO (double-pole) contact, not for use for center neutral or sequential limit switches
LSZ3M	2NC-2NO special	Replacement contact block with 2NC/2NO (double-pole) contact for center neutral or sequential limit switches

## ADDITIONAL MATERIALS

The following associated literature is available at [sensing.honeywell.com](http://sensing.honeywell.com):

- Product range guide
- Product installation instructions
- Application notes
- CAD drawings
- Product images

### **WARNING** **PERSONAL INJURY**

DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

**Failure to comply with these instructions could result in death or serious injury.**

### **WARNING** **MISUSE OF DOCUMENTATION**

- The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

**Failure to comply with these instructions could result in death or serious injury.**

### **Warranty/Remedy**

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship during the applicable warranty period. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgment or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items that Honeywell, in its sole discretion, finds defective. **The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**

While Honeywell may provide application assistance personally, through our literature and the Honeywell web site, it is buyer's sole responsibility to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this writing. However, Honeywell assumes no responsibility for its use.
